# Scope and Content Information

The Gorges family papers consist of ca. 5,000 items, 1616-1940, and contain the material used by Raymond Gorges to write his book, *The Story of a Family through Eleven Centuries, History of the Gorges Family*. The book provides an excellent guide to the materials; the items have been identified according to Mr. Gorges and left in the order used by him with slight modifications. The papers include genealogy information that Mr. Gorges used to produce his pedigree located at the end of the book. There are also family histories, beginning in 1066 when the family was in France; and individual biographies. This material contains information on the careers and schooling of family members as well as copies of their correspondence. The legal papers are an excellent source of English documents and provide added information on the family's interesting and noble history. Also provided is historical information used to provide background for Mr. Gorges' book. Included are Mr. Gorges' research notes which give some indication of his organization for the book. Although he failed to publish it in his lifetime, his wife had the book published to his specifications. There are also postcards of country scenes in England and Ireland. The materials deal with the entire history of the family from 1066 to the 20th Century but original documents date from 1618. Also included is Mr. Gorges' personal correspondence about his research; this correspondence is interfiled with relevant materials. This is an excellent collection for historical information on England and Ireland especially the historical intertwining of the two nations.
