Abstract

Records of Engineer Roland P. Davis, who was associated with the College of Engineering at West Virginia University, serving as a professor (1911-1932), and later as Dean (1932-1955). These papers document his work as a consultant, including work for the State Road Commission as a "Consulting Bridge Engineer". There are extensive records and photographs regarding bridges in West Virginia, including the New Martinsville Bridge, the Parkersburg suspension bridge, and others. There are also published reports regarding West Virginia highways, and many product prospectuses in connection with concrete, rivets and bolts, steel, and welding, among other topics. Box 1 contains biographical information regarding Roland P. Davis.

Creator

Davis, Roland P. (Roland Parker), 1884-

Extent

10.8 Linear Feet 10 ft. 10 in. (26 document cases, 5 in. each)
